PROFESSIONAL OBJECTIVE

Computer Science graduate with solid experience in web development and technology solutions management. I have participated in Full Stack projects, involved in all phases of the software development lifecycle, from requirements gathering and analysis to application development, implementation, and maintenance. I have experience in developing modern frontend interfaces and building robust backend services, as well as in the design and management of relational and non-relational databases. I excel at transforming business needs into efficient, scalable, and maintainable technology solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Public Institution – Education Sector and Fiscal Control (Venezuela) - July 2024 - July 2025

- I participated in the design, development, and implementation of a comprehensive academic and administrative management system.
- I gathered requirements from key users and translated operational needs into functional technological solutions.
- I developed frontend and backend functionalities, integrating business logic, services, and validation processes.
- I designed and managed the relational database, ensuring data integrity, performance, and scalability.
- I implemented a solution comprised of nine interconnected modules, improving traceability and reducing manual tasks.
- I participated in the entire software development lifecycle: analysis, development, testing, implementation, and initial support.

Technology Center Coordinator

Nueva Esparta University - February 2024 - September 2025

- I led a team of six professionals to implement and maintain technology services.
- I maintained servers and websites, ensuring their availability and security.
- I provided technical support and incident resolution for users and platforms.
- I managed and oversaw critical projects, ensuring on-time delivery.
- I optimized operational processes to improve platform continuity and efficiency.
- I implemented preventative procedures to anticipate and quickly correct failures.
- I supported institutional growth and innovation by improving the digital infrastructure.

Technological Project Development

- I designed and developed websites and landing pages geared towards functional objectives.
- I implemented complex systems (cinema management applications and educational platforms).
- I used modern technologies and frameworks to build scalable and maintainable solutions.
- I worked both individually and in multidisciplinary teams, participating in all phases of the project.
- I developed innovative solutions that respond to real needs and improve processes.
- I adapted and solved technological challenges in constantly evolving environments.

EDUCATION

Bachelor's Degree in Computer Science

Nueva Esparta University (September 2025)

Web Development Course

Undemy.(2024)

Bachelor of Science

Jean Piaget Institute (July 2021)

SKILLS

- **Languages and Frontend:** HTML, CSS, JavaScript, SASS, Bootstrap, Tailwind CSS, Vue, React, Next.js
- **Backend:** Node.js, Express, TypeScript, NestJS
- **Databases:** SQL (MariaDB, PostgreSQL, SQLite), NoSQL (MongoDB)
- **ORM and Version Control:** Prisma, Sequelize, Mongoose, Git, GitHub
- **Tools:** Visual Studio Code, Jira, DBeaver, MySQL Workbench, Laragon, PSeInt, Wireframe Sketcher, Microsoft Office
- **Methodologies:** Scrum, Kanban, Agile Development
- **Competencies:** Systems analysis, teamwork, time management, leadership, effective communication

LANGUAGES

- **English:** Level B1/B2
- **Spanish:** Native
